

BBB's Impotent - Yet Another Scam Loophole!

YET ANOTHER REASON THE BBB IS A SCAM AND IMPOTENT!!!

I contacted the BBB of Cleveland about a Debt Collection Company called TekCollect. In Colorado, where I live, they have to list a web site address on letters and didn't.

Here's the rub:

Agree with me that all BBB-related company complaints are either torts or crimes. Crimes are against the law, torts are financially injuring someone. So, 'legal matters' are the whole reason the BBB is in business, right? WRONG!

They are there to make member companies look 'better' than non-members for the same reason that RipOffReport accuses them of: 'Properly addressed complaints with good faith to resolve' boost your score, even when this dog-screws the consumer!

When the BBB, already accepting my complaint, got the company's 'we have stopped collecting and this stupid jerk is just making waves for us' response - which by the way responded to NONE of my complaints - I filed another, providing the Colorado Legal Code to prove their response was a lie.

They promptly dismissed my claim as 'we do not mediate legal matters'. If every matter is eventually a legal matter by definition, what good are BBB's? NONE!

Further, I pointed them to the BBB Ripoff Report and told them they were admitting complete impotence! They advised me via email to stop contacting them for any reason. BACH, BACH, BACH! Funny thing about that little white top on chicken poop... (that's chicken poop too!)

I am the owner of a small real estate & mortgage brokerage - and by the way I love that Broker Book RipOff sells! he's dead on that 90% of us WILL rip you off, lie, cheat and steal your money! - and I REFUSE to use the BBB because:

- 1) I won't pay for an impotent organization that will just cause me trouble;
- 2) I won't financially support a legalized scam;
- 3) I won't pay for the financial terrorism bounty they want, 'join us or you aren't an honest company!';
- 4) I won't pay for a company that WORKS FOR THE BUSINESSES but claims to represent CONSUMERS; and,
- 5) Companies who do the right thing SHOULDN'T need a BBB - but that doesn't mean REAL watchdogs aren't needed!

PS: BBB's, don't like my response? READ THE FIRST AMMENDMENT!
